VINOTH S

Software Engineer – Teamcenter PLM / Active Workspace (AWC) Developer
vinothvishwa3@gmail.com | +91-8681987970

PROFESSIONAL SUMMARY

Teamcenter PLM Developer with 3.6 years of experience delivering Siemens Teamcenter and Active Workspace (AWC) solutions for global manufacturing clients. Skilled in AWC declarative customization, ITK C++ server-side development, BMIDE data modeling, SOA services and workflow handler development. Experienced in end-to-end KeyTech-to-Teamcenter data migration using Pentaho ETL, CSV2TCXML and TCXML. Builds AI-assisted tools for PLM attribute mapping and report generation.

CORE COMPETENCIES

AWC Customization • ITK Server-Side Development • BMIDE Data Modeling • Workflow Handlers & Extensions • SOA Services • XRT Stylesheets & DCP • Structure Manager / BOM • Change Management • Classification • PLM Data Migration (ETL, TCXML) • AI-Assisted PLM Tools

TECHNICAL SKILLS

- **Teamcenter PLM:** Teamcenter 13.3, 14.3, 2406, 2512; Active Workspace (AWC) 6.3, 2406, 2512
- **Customization:** ITK (C++), SOA services, AWC declarative framework (view models, commands, conditions, data providers), XRT stylesheets, Dynamic Compound Properties (DCP), workflow handlers, pre/post-action extensions
- **Configuration:** BMIDE (business objects, LOVs, GRM rules, naming rules, business rules), Workflow Designer, Structure Manager (BOM), Change Management, Classification, Query Builder, Access Manager, ADA License
- **Data Migration:** KeyTech to Teamcenter, SolidWorks (SWIM), Pentaho Data Integration (ETL), CSV2TCXML, TCXML, MSSQL
- **Programming:** C++, JavaScript, SQL, JSON
- **AI & Automation:** Gemini AI integration, prompt-based query generation, AI-assisted attribute mapping
- **Tools:** Visual Studio, VS Code, JIRA

PROFESSIONAL EXPERIENCE

Software Engineer – Teamcenter PLM | Intelizign Lifecycle Services | Jun 2023 – Present

Design, customize and configure Siemens Teamcenter and Active Workspace solutions across implementation and migration projects. Own AWC UI customization, ITK server-side development, custom workflow handlers, SOA services and BMIDE configuration.

KEY PROJECTS

Project 1: Gore Technology – AWC & ITK Customization | Client: Gore (USA) | Jan 2024 – Oct 2024 | Role: Teamcenter Developer

- Configured BMIDE data model elements including LOVs, GRM relation rules, naming rules and business rules.
- Designed XRT stylesheets with Dynamic Compound Properties (DCP) to display child-object properties at parent level.
- Developed custom ITK workflow handlers to enforce business rules during workflow execution.
- Implemented ITK pre-/post-action extensions to validate Check-In and Check-Out operations.
- Built an ITK BOM traversal utility to verify the release status of all child components.

Project 2: EzXChange – AWC Configuration & Customization | Client: Goodyear | Nov 2024 – Jun 2025 | Teamcenter 14.3, AWC 6.3

- Delivered end-to-end AWC customization including custom tiles, locations, sublocations and SPLM tables.
- Implemented file upload and download through Teamcenter FMS (File Management System).
- Customized AWC commands, command panels, lifecycle hooks, conditions and data providers using the declarative framework.
- Configured XRT-based dataset content preview and view-to-view data exchange using subPanelContext.
- Implemented Dynamic Compound Properties (DCP) and custom icons for business objects and release statuses.

Project 3: Multivac – Teamcenter Implementation & KeyTech Data Migration | Client: Multivac | Jul 2025 – Present | Teamcenter 2406 | Role: Software Engineer

Phase 1 – Development | Jul 2025 – Dec 2025

- Prepared the base data model and configured BMIDE business objects and properties.
- Configured business rules, GRM relation rules and naming rules in BMIDE.
- Developed ITK workflow handlers and extensions for business validations.
- Developed ITK customization to update custom BOM line attributes in Structure Manager.

Phase 2 – Data Migration | Jan 2026 – Present

- Migrating CAD data, metadata and non-CAD document datasets from KeyTech PLM to Teamcenter 2406.
- Migrating Change Management objects and Classification objects (ICOs) with their attribute values.
- Performing data extraction, transformation and validation using Pentaho Data Integration (ETL) and MSSQL.
- Generating and importing TCXML through CSV2TCXML and validating import results.

INNOVATION & POCS

- **ADA License Management (AWC):** Designed and built a complete ADA License module in AWC, replicating RAC-only functionality. Enabled create, modify, delete and assign of ADA licenses to users, groups and roles as a fully functional platform-level customization.
- **AI Migrator:** Developed an AI-assisted migration tool that maps attributes between different PLM systems, reducing manual mapping effort and improving migration accuracy.
- **Generative Report Builder:** Built a prompt-driven reporting tool integrating Gemini AI to generate JSON-based queries, execute SOA calls to fetch Teamcenter objects dynamically, and generate reports automatically from user prompts.

EDUCATION

- Master of Computer Applications (MCA) | 2021
- Bachelor of Computer Applications (BCA) | 2019
- Higher Secondary | 2016
- Secondary (SSLC) | 2014
